

# **Kentucky State Building & Construction Trades Council Endorses Larry Clark**

FRANKFORT – The Kentucky State Building & Construction Trades Council, AFL-CIO consisting of 15 construction trade unions representing over 35,000 workers endorsed House Speaker Pro-Tem Larry Clark for re-election in the 46<sup>th</sup> District.

Larry L. Roberts, State Director for the Council said, “By any objective standard, Larry Clark is one of the most effective, hard working members of the General Assembly when it comes to standing up for Kentucky’s working men and women. He has not missed a vote since arriving in the General Assembly in 1984. Larry Clark grew up in a blue collar neighborhood and is a member of the International Brotherhood of Electrical Workers Local 369 which gives him a better understanding of the issues that affect our members.

As the ONLY member of Democratic leadership from Louisville/Jefferson County - in either the House or Senate – it is critical to Jefferson County and the working men and women of the Metro-Louisville area continue to have a strong voice in leadership decisions, especially decisions that impact our members and their families.

The Council will aggressively communicate with our members to insure they understand the importance of this election. Our members are prepared to knock on doors, staff phone banks and engage in other grassroots activities to re-elect Larry Clark.
